

# My Heart Will Never Die

by Brett Birkill

A day of happiness turns into a night of bliss  
And soon a life full of memories I wish for  
Hesitation creeps in and challenges lie ahead  
But it's my heart that pains begging you for more

Yes its true life can be so easy or so hard  
It doesn't matter as long as you are here  
The helping light you shine in the middle of the night

Always turns my doubt into clear  
It's you and me together  
I'll be yours forever  
Agree to never say never  
Cause when it's you and me together  
My heart will never die

Noise gets through, takes our time, doubt creeps in, hope you're still mine  
you tell me every day look up and not down  
It's always me who trips and falls but your love makes me stand tall  
Your sweet heart always sings the perfect sound

Our time needs lots of smiles and never any frowns  
Like all things it'll come to the end one day  
Think happy now sorry if I ever let you down  
Laugh and smile the rest of the way

It's you and me together  
I'll be yours forever  
Agree to never say never  
Cause when it's you and me together  
My heart will never die
